#### Step 4 Import private key from TronLink wallet

Click on Tronlink red icon, go to Accounts -> Export

#### Step 5 Copy "Private key"

### Export Account

Your account **a** was imported from a private key. This means that you can only export the **private key**, and not a mnemonic phrase

Write down your private key now. This will prevent unwanted loss of funds in the future

Private Key

[Redacted private key] eb1d

Go to Wallet

## Step 6 Import Private key to Scatter

I Enter password and click **Create new Scatter**

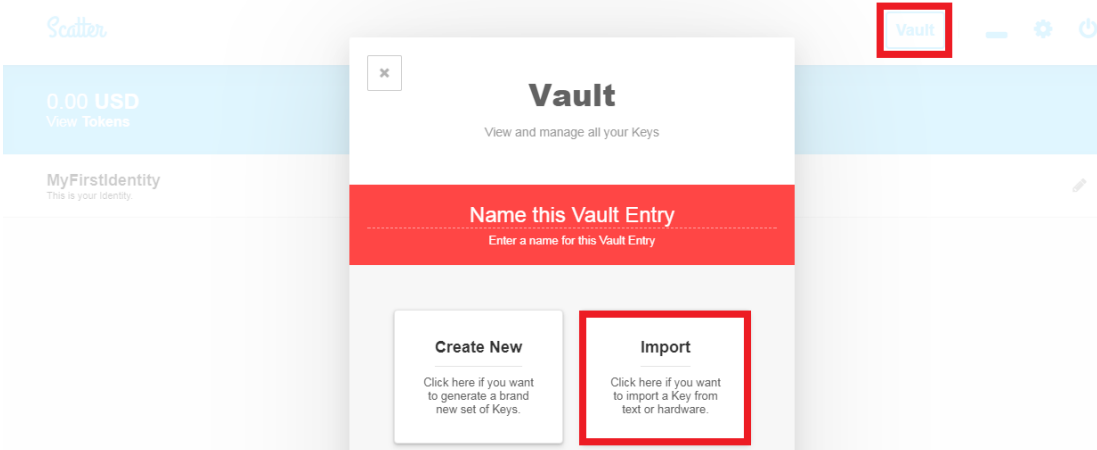

Two password input fields, each consisting of a row of 12 dots. The second field has a vertical cursor line at the end.

**Create new Scatter**

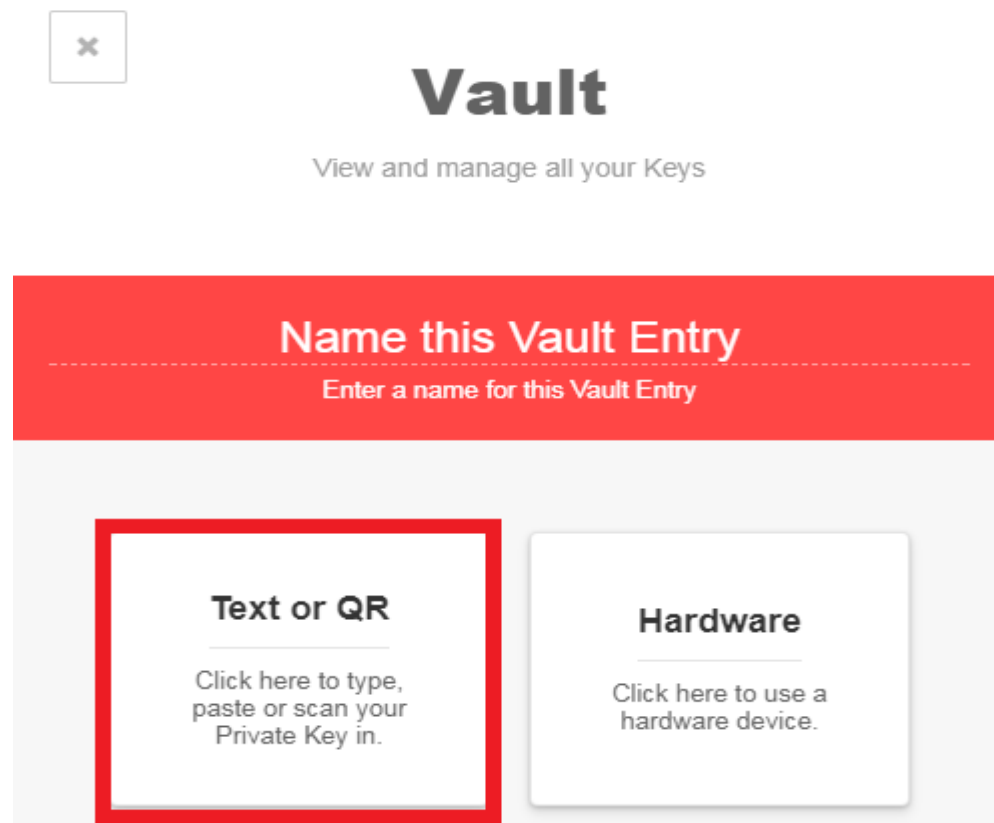

**Import from Backup**

II click on "Vault" then "Import"

The interface shows the Scatter logo and a balance of 0.00 USD. A modal window titled "Vault" is open, displaying the text "View and manage all your Keys". Below this, a red bar prompts the user to "Name this Vault Entry" with the instruction "Enter a name for this Vault Entry". At the bottom, there are two buttons: "Create New" (with a subtext "Click here if you want to generate a brand new set of Keys.") and "Import" (with a subtext "Click here if you want to import a Key from text or hardware."). The "Vault" button in the top right corner of the main interface is highlighted with a red box, and the "Import" button in the modal is also highlighted with a red box.

III click on "Text or QR" and paste your private key from TronLink and Enter a name for the Wallet Entry.

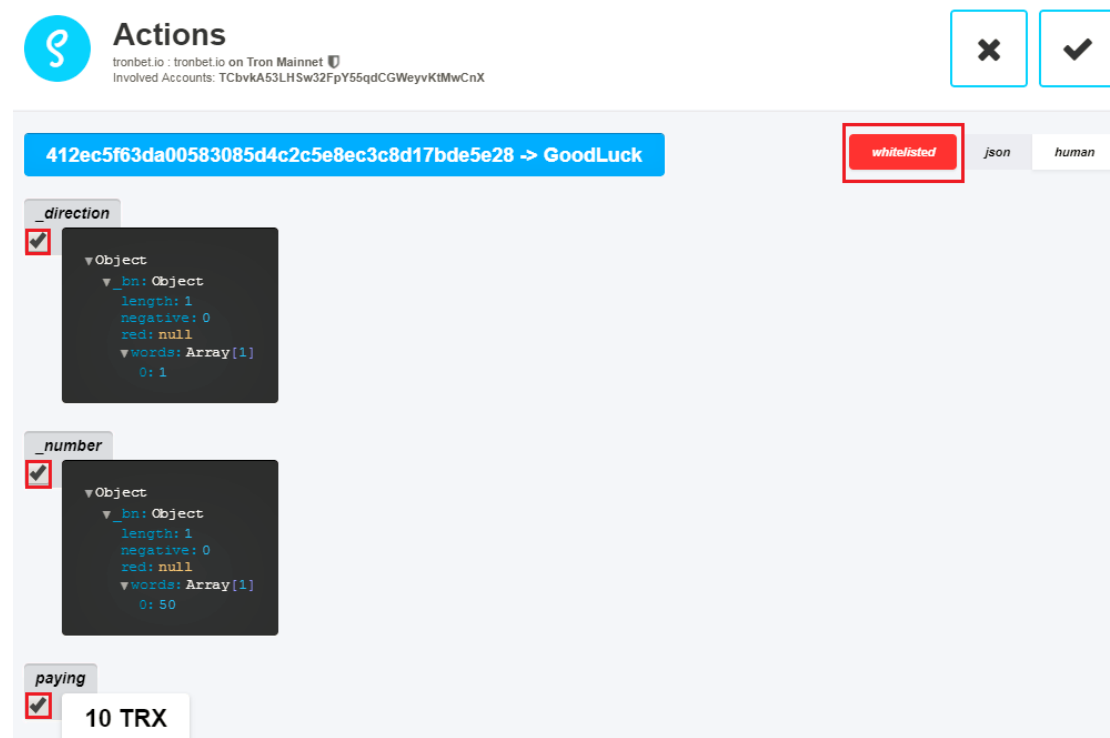

#### Step 7: Cancel Confirmation Screen

Navigate to Tronbet.io and select Scatter at the top right of the screen.

Make a bet and hit "roll"

On Scatter click on **whitelisted** and check all the boxes and hit the checkmark.

Direction – Over or Under

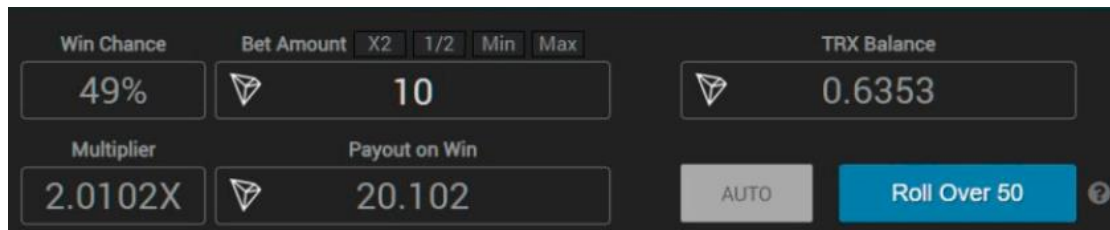

Number – Prediction number

Paying – Bet Amount

If you decide to whitelist these options, the confirmation page will no longer pop-up.

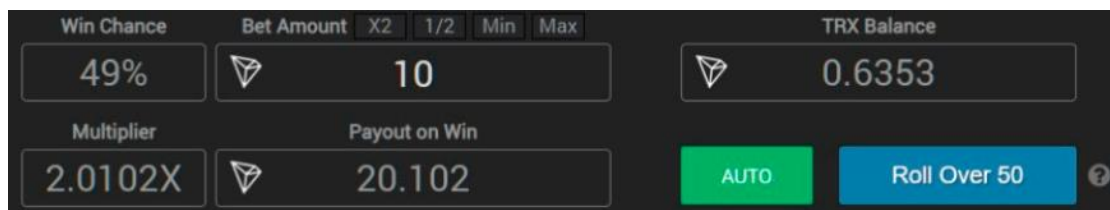

#### Step 8: **AUTO BET**

When "Auto" is grey – the function is **OFF**

The screenshot shows a betting interface with a dark background. At the top, there are four main sections: 'Win Chance' with a value of 49%, 'Bet Amount' with a value of 10 and buttons for X2, 1/2, Min, and Max, 'TRX Balance' with a value of 0.6353, and a 'Multiplier' of 2.0102X. Below these, there is a 'Payout on Win' section with a value of 20.102. At the bottom right, there are two buttons: 'AUTO' (grey) and 'Roll Over 50' (blue). A small question mark icon is visible next to the 'Roll Over 50' button.

When "Auto" is grey – the function is **ON**

The screenshot shows the same betting interface as the previous one, but with the 'AUTO' button now green, indicating it is active. The 'Roll Over 50' button remains blue. All other values and buttons are the same as in the previous screenshot.

After you select **AUTO** you will have to click on “roll” once to activate it. During AUTO you will not be able to change your bet, prediction, or over or under. To deactivate AUTO just click on AUTO again.

**Note: Please use auto-roll under your own decision. Visual errors may occur)**
